

FIRST AID FOR FEBRILE CONVULSIONS

A febrile convulsion is a fit or seizure that can occur in a child with a fever.

AUSTRALIAWIDE
FIRST AID

STEP
01

Stay calm and remain with the child.

STEP
02

Protect them from harm by moving any objects and/or bystanders out of the way.

If the child has tight clothing on, loosen it. If possible, also remove or open their clothing from the waist up.

STEP
03

STEP
04

Note the start time and duration of the convulsion.

STEP
05

Once the child has stopped convulsing, roll them into the recovery position, place cool washcloths on their neck and forehead, and sponge their body with tepid water.

STEP
06

Contact Triple Zero (000) if the convulsion lasted for more than 5 minutes, a second convulsion occurs, or the child appears unwell.
